Accounting Information Systems, 2e (BookStuvia)
 Chapter 7 Accounting Systems and Business Processes

Objective 1

1) How do modern accounting systems already developed, the new line for developing a system can be designed?

Answer: B, D, E

Objective 2

2) Some of the benefits of using an off-the-shelf accounting system are lower cost, higher security, and flexibility.

Answer: A, B, C, D, E

Objective 3

3) What is the role of business processes in the accounting system?

Answer: A, B, C, D, E

Objective 4

4) When adapting an organization's business processes to meet a business system process, process reengineering is often used to redesign internal and external business processes.

Answer: A, B, C, D, E

Objective 5

5) What are the advantages of process reengineering in the accounting system?

Answer: A, B, C, D, E

Objective 6

6) The main line for developing a system can be significantly reduced by the use of process reengineering.

Answer: A, B, C, D, E

Objective 7

7) What is the role of business processes in the accounting system?

Answer: A, B, C, D, E

Objective 8

8) Some of the advantages of developing a business accounting system are:

Answer: A, B, C, D, E

Objective 9

9) The main line for developing a system can be significantly reduced by the use of process reengineering.

Answer: A, B, C, D, E

Objective 10

10) Some of the advantages of developing a business accounting system are:

Answer: A, B, C, D, E

Objective 11

11) Some of the advantages of developing a business accounting system are:

Answer: A, B, C, D, E

Objective 12

12) Some of the advantages of developing a business accounting system are:

Answer: A, B, C, D, E

Objective 13

13) Some of the advantages of developing a business accounting system are:

Answer: A, B, C, D, E

Objective 14

14) Some of the advantages of developing a business accounting system are:

Answer: A, B, C, D, E

Objective 15

15) Some of the advantages of developing a business accounting system are:

Answer: A, B, C, D, E

Chapter 1 Managerial Accounting and the Business Environment

Solutions to Questions

- 1-1** Managerial accounting is concerned with providing information to managers for use within the organization. Financial accounting is concerned with providing information to stockholders, creditors, and others outside of the organization.
- 1-2** Essentially, managers carry out three major activities in an organization: planning, directing and motivating, and controlling. All three activities involve decision making.
- 1-3** The Planning and Control Cycle involves formulating plans, implementing plans, measuring performance, and evaluating differences between planned and actual performance.
- 1-4** A line position is directly related to the achievement of the basic objectives of the organization. A staff position is not directly related to the achievement of those objectives; rather, it is supportive, providing services and assistance to other parts of the organization.
- 1-5** In contrast to financial accounting, managerial accounting: (1) focuses on the needs of the manager; (2) places more emphasis on the future; (3) emphasizes relevance and flexibility, rather than precision; (4) emphasizes the segments of an organization; (5) is not governed by GAAP; and (6) is not mandatory.
- 1-6** A number of benefits accrue from reduced setup time. First, reduced setup time allows a company to produce in smaller batches, which in turn reduces the level of inventories. Second, reduced setup time allows a company to spend more time producing goods and less time getting ready to produce. Third, the ability to rapidly change from making one product to making another allows the company to respond more quickly to customers. Finally, smaller batches make it easier to spot manufacturing problems before they result in a large number of defective units.
- 1-7** The main benefits of a successful JIT system are reductions in: (1) funds tied up in inventories; (2) space requirements; (3) throughput time; and (4) defects.
- 1-8** TQM generally approaches improvement in a series of small steps that are planned and implemented by teams of front-line workers. Process Reengineering involves completely redesigning business processes from the ground up—often with the use of outside consultants.
- 1-9** If Process Reengineering is successful, fewer workers are needed. If management responds by laying off workers, morale will almost certainly suffer.
- 1-10** Some benefits from improvement efforts come from cost reductions, but the primary benefit is often an increase in capacity. At non-constraints, increases in capacity just add to the already-existing excess capacity. Therefore, improvement efforts should ordinarily focus on the constraint.
- 1-11** If people generally did not act ethically in business, no one would trust anyone else and people would be reluctant to enter into business transactions. The result would be less funds raised in capital markets, fewer goods and services available for sale, lower quality, and higher prices.
